

# SilentPower™

> Acoustic enclosures

For diesel generator sets ranging from 15 to 750 kVA  
Designed to meet the most stringent norms for noise levels  
Manufactured in state-of-the-art facilities  
Easy maintenance with better service access

# SilentPower™

Meeting the most stringent emission and noise norms of the industry, these enclosures guarantee value for years to come.

'SilentPower™' range of generating sets -  
15 kVA to 750 kVA

The new 'SilentPower™' range of Acoustic Enclosures is a result of path breaking development work by a team of highly skilled and proficient engineers from Cummins Power Generation and Powerica Limited. These compact, fully integrated, weatherproof acoustic enclosures are designed to provide truly world class sound attenuation besides offering easier serviceability and maintenance, lesser noise levels, greater reliability and a host of user-friendly features.

Designed and approved by Cummins, these enclosures meet the most stringent noise levels specified by the Ministry of Environment and Forest, (MOEF) Government of India (GOI), as per notification no. GSR 371(E) dated May 17, 2002 and are certified for noise control levels of 75 dbA @ 1 meter distance by the MOEF, GOI appointed nodal agencies.

State-of-the-art manufacturing facilities such as, CNC machines and automated welding, painting and powder coating processes, ensure uniform paint quality and superior finish for a longer and more durable life even at outdoor applications. The 2 mm gauge CRCA sheets provide greater strength and longer shelf life whilst the specially manufactured EPDN gasket fittings help prevent sound leakage. Specially designed lifting points on the base frame assist in load sharing during lifting. Provision of an emergency push button on the outside of the enclosure is in adherence to the required security and safety measures.

# Design and features

Facility at Bangalore

Conveyerised powder coating line

Single point lifting for easy handling at customer site (up to 380 KVA)

Wide access doors for easy maintenance

Compact design

Long lasting acoustic insulation behind perforated steel for attenuation

Acoustic enclosures are designed with a host of user friendly features making them an ideal choice for industries that need reliable and safe source of power.

CNC turret punch and press brakes for accuracy in punching, bending and shearing

### Product features

- Door open retainers
- Easy access to the battery for top up
- Easy access to the radiator for cleaning
- Powder coated for superior finish and longer weather resistance
- Stainless steel fasteners for longer life
- Flush styling - no projections

Every enclosure is certified to meet the Emission norms

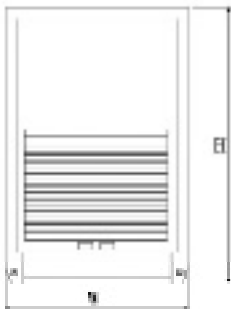

Recessed, easily accessible emergency stop button

Instrument panel viewing window

Cable entry provision for easy installation at site

### Typical enclosed genset dimensions\*

Model	Prime Rating (kVA)	Engine Model	Enclosure Dimensions		
			Length (mm)	Width (mm)	Height (mm)
CP 15 D5 P	15	X 1.7 G1	2200	900	1375
