

Cummins launches compact generator sets for consumer and retail markets

Introduces small generator sets of 7.5 kVA and 10 kVA ratings

Delhi, January 27: Cummins India Ltd., the country's leading manufacturer of diesel and natural gas engines for power generation, industrial and automotive markets has launched a series of generator sets for the consumer and retail markets. As a grand opening to its foray in this segment, Beau Lintereur, Vice President, Power Generation Business Unit of Cummins India Limited, unveiled the product to dealers, distributors and customers at the Taj Palace hotel in Delhi today.

The Power Generation Business manufactures low and high horse power generator sets in capacities ranging from 15 kVA to 3000 kVA. With an objective of expanding its product range, the Business has now added lower capacities to the existing range. Categorized as Sub 12 kW, these generator sets will be available in 7.5 kVA and 10 kVA ratings, and will cater to power needs of lesser capacities such as those required by individual households, shops, nursing homes, clinics, SMEs, network customers, government institutions, etc. The new series of generator set is titled as X1.3, where 1.3 indicates the engine capacity.

Apart from world class technology, these compact generator sets maximize fuel efficiency with durability of greater than 30 hours autonomy. With noise levels as low as 70 dBA at 1 meter, the new series delivers on its assurance of 'More Power, Smaller footprint'.

The X1.3 series will be manufactured at Cummins' power generation facility at Pirangut, near Pune. The plant has a capacity to manufacture 50,000 diesel generator sets and G-drive engines and 12,000 units of X1.3 series annually. The new series is available with the Company's GOEM's and their dealers, as well as the Distribution Business of Cummins and its distributors and retailers across India.

Speaking on the occasion, Beau Lintereur, Vice President, Power Generation Business of Cummins India Limited said, "Reliable and uninterrupted power supply is the engine of growth for any developing economy. We saw immense potential in the retail markets for a compact, economical and environment friendly source for power generation. With Cummins' expertise and market leadership in the high and low capacity generator sets, the untapped markets provide us

the right opportunity to expand our base and create value to our customers. With the X 1.3 series, we reinstate our commitment to provide complete power solutions and remain a dependable power partner to our customers.”

Cummins Sales and Service India (CSS), the Distribution Business Unit of Cummins India Limited, with its nation-wide network comprising 4 Zonal offices, 20 Area offices and 58 service dealers, will undertake and support the after-sales service of the new product across the Country. CSS will provide service and spare part support, and solutions such as Annual Maintenance Contract and Comprehensive Annual Maintenance Contract to customers.
